

Markdown to PDF Converter

A simple CLI tool to convert Markdown files to PDF using Node.js.

Prerequisites

- Node.js installed on your system.

Setup

1. Navigate to this directory:

```
cd md_to_pdf
```

2. Install dependencies:

```
npm install
```

Usage

You can run the script directly as an executable:

```
./convert.js <path-to-markdown-file>
```

Or using `node` :

```
node convert.js <path-to-markdown-file>
```

Example

```
./convert.js ../README.md
```

This will create a `../README.pdf` file.
